Arup Internship Program For Graduates 2025

Description

The Arup Internship program is an exceptional opportunity for students and recent graduates to gain hands-on experience in a leading engineering and design consultancy. The internship spans various fields including civil, structural, and environmental engineering, architecture, and urban planning. Typically lasting between three to six months, the program is offered in multiple global locations including New York, London, Sydney, and Hong Kong.

Responsibilities

Interns at Arup are expected to engage in a variety of tasks, such as:

- Assisting in the design and analysis of projects under the guidance of senior engineers and architects.
- Conducting research and contributing to the development of innovative solutions.
- Supporting project teams with technical documentation and report preparation.
- Participating in team meetings and brainstorming sessions.

Qualifications

Candidates should be pursuing or have recently completed a degree in engineering, architecture, or a related discipline. Strong academic performance and a passion for design and innovation are essential. Familiarity with design software such as AutoCAD, Revit, or similar tools is highly desirable.

Job Benefits

Interns will benefit from:

- Mentorship from industry leaders and seasoned professionals.
- Access to a global network of professionals and experts within Arup.
- Opportunities for training and development in cutting-edge technologies and methodologies.
- The potential for full-time employment upon successful completion of the internship.

Experience

While prior experience in a professional environment is not mandatory, it is advantageous. Previous internships, project work, or involvement in relevant student organizations can provide a competitive edge.

Skills

The ideal candidate should possess:

- Strong analytical and problem-solving skills.
- Excellent communication and teamwork abilities.
- Creativity and a proactive approach to learning.
- Adaptability to work in a fast-paced, dynamic environment.

Contacts

Interested candidates should apply through Arup's online career portal. Applications
