Mbda Internship For Graduates 2024-2025

Description

The MBDA Internship program offers students and recent graduates a unique opportunity to gain hands-on experience in the defense and aerospace industry. As an intern at MBDA, you will be part of a dynamic team working on cutting-edge projects that contribute to national defense and security. This program is designed to provide you with a comprehensive understanding of the industry while allowing you to apply your academic knowledge in a real-world setting.

Responsibilities

Interns at MBDA are entrusted with a variety of tasks that provide valuable insights into the operations of the company. Key responsibilities may include:

- Assisting in the design and development of missile systems and components.
- Collaborating with engineers and project managers to support ongoing projects.
- Conducting research and analysis to contribute to technical reports.
- Participating in team meetings and brainstorming sessions.
- Supporting the testing and evaluation of prototypes and systems.

Qualifications

To qualify for the MBDA Internship, candidates should meet the following criteria:

- Currently enrolled in or a recent graduate of a relevant degree program (e.g., engineering, computer science, physics).
- Strong academic performance and a keen interest in the defense and aerospace sector.
- Excellent problem-solving skills and attention to detail.
- Ability to work collaboratively in a team environment.
- Strong communication skills, both written and verbal.

Job Benefits

The MBDA Internship offers several benefits that make it an attractive option for aspiring professionals:

- Competitive compensation and potential housing assistance.
- Mentorship from experienced industry professionals.
- Networking opportunities with experts and leaders in the field.
- Access to state-of-the-art technology and facilities.
- Opportunity to work on impactful projects that contribute to national security.

Experience

Interns will gain substantial experience in the defense industry, learning about the lifecycle of products from concept through to delivery. This program provides a platform to develop technical skills, understand complex engineering problems, and experience how integrated teams operate in a high-stakes environment.

Hiring organization

Mbda Internship

Employment Type

Full-time, Intern

Duration of employment

6

Industry

Defense and Space Manufacturing

Job Location

London, England, United Kingdom,
E1 7HT, London, England, United Kingdom

Working Hours

8

Base Salary

10
